THE AUSTRALIAN CLUB - TECHNOLOGY TABLE

WITH MR DAVID JAHSHAN , CHIEF TECHNOLOGY OFFICER, AXIFLUX PTY LTD

“ The Future of the Electrical Machine”

The electrical machine is the cornerstone of modern life and the facilitator of nearly everything we do. From generating electrical energy at our power stations to starting our cars in the morning, the humble electric motor/generator has changed little over the past 100 years.

For the past three years, David has been the principal designer of an innovative twist to the Electrical Machine, resulting in significant size, weight and price reduction, while increasing its power output, efficiency and maintainability. Axiflux P/L was established to commercialize this exciting new technology.

David has developed numerous projects from conception to production over the last 15 years. He has developed innovative electronic, mechanical and software solutions across the manufacturing, automotive, building, financial, agricultural and educational sectors.

Mr David Jahshan

For nearly a decade, David has been sharing his experience with future generations of engineers as a sessional lecturer of engineering design at The University of Melbourne. Over this time he has been pivotal in establishing The University of Melbourne's international robotic soccer team, where teams of fully autonomous robots play a game of soccer with a full sized soccer ball.

David will share his vision for the electrical machine and the massive opportunities across numerous sectors that lie ahead by improving its core architecture.

Reservations may be made via e-mail to jasmine.hong@theaustralianclub.com.au, by fax to 039600 0656 or via the website, www.theaustralianclub.com.au
